PROJECTS

AI for Cancer Analysis

10/23 - Present

- ML model trained to predict breast cancer in Patients

Shopping-Website | ReactJs, SCSS, Firebase

- The Shopping Website, crafted with **ReactJs** and **SCSS** prioritizes a secure and streamlined e-commerce experience. Firebase handles **user authentication**, real-time data storage, and product information. **Private routes** bolster security, and **React contexts** optimize state management, particularly within the shopping cart.

Keeper-App | ReactJs, CSS

- The Keeper App is a sleek ReactJs-based note-taking application. Its intuitive interface allows users to effortlessly create, edit, and delete notes and lists. With a visually appealing design implemented using CSS, the app provides a seamless and enjoyable experience for organizing thoughts and managing tasks.
